

GLYCOLIC ACID 25 PEEL

ACTIVE INGREDIENT - GLYCOLIC ACID

- Glycolic 25% Peel is a superficial chemical peel formulated with Alpha Hydroxy Acid (AHA) derived from sugarcane. It works by gently exfoliating the outermost layer of the skin, accelerating cell turnover, and stimulating collagen production.
- This peel is ideal for improving dull, uneven, acne-prone, and pigmented skin — delivering visible brightness and smoother texture with minimal downtime.

INDICATION

- Moderate Acne
- Open Pores
- Oily T-Zone
- Acne Marks

BENEFITS

- Deep exfoliation of dead skin cells
- Enhances skin brightness and natural glow
- Reduces pigmentation and tanning
- Controls acne and unclogs pores
- Improves uneven skin texture
- Softens fine lines and early signs of aging
- Promotes collagen stimulation
- Improves absorption of skincare products
