

Glycolic 35% PEEL

ACTIVE INGREDIENT - Glycolic35%

- Glycolic 35% Peel is a high-strength Alpha Hydroxy Acid (AHA) peel designed for intensive epidermal exfoliation and accelerated cellular turnover. With its deeper penetration compared to lower concentrations, it effectively targets stubborn pigmentation, post-acne marks, uneven texture, and early photoaging.
- Recommended for experienced peel candidates, this formulation delivers visible skin refinement and rejuvenation under professional supervision.

INDICATION

- Medium to Top Superficial Peel Stubborn Pigmentation
- Fine Lines
- Sun Damage
