

Jessner Peel

ACTIVE INGREDIENT - Salicylic Acid 14%, Lactic Acid 14%, Resorcinol

- Jessner Peel is a synergistic combination peel formulated with Salicylic Acid 14%, Lactic Acid 14%, and Resorcinol 14%.
- This balanced triple-acid formulation provides controlled medium-depth exfoliation, targeting acne, pigmentation, uneven texture, and early signs of aging.
- Each component plays a specific role: Salicylic Acid (14%) – Oil control & deep pore cleansing Lactic Acid (14%) – Gentle exfoliation & skin brightening Resorcinol (14%) – Enhances penetration & promotes skin renewal
- Together, they deliver powerful corrective results while maintaining controlled application under professional supervision.
