

SALICYLIC 30% PEEL

ACTIVE INGREDIENT - Trichloroacetic Acid

- Salicylic 30% Peel is a high-strength Beta Hydroxy Acid (BHA) chemical peel formulated for severe oily and acne-prone skin. Due to its oil-soluble nature, salicylic acid penetrates deeply into sebaceous follicles, dissolving excess sebum, reducing inflammation, and effectively clearing pore congestion.
- This advanced concentration is ideal for stubborn acne, resistant comedones, and post-acne pigmentation, delivering intensive exfoliation with controlled professional application.

INDICATION

- Severe Acne
- Comedones
- PIH
- Seborrheic Skin

BENEFITS

- Deep follicular penetration and pore purification
- Strong sebum regulation for very oily skin
- Significant reduction in active acne lesions
- Effective clearance of blackheads & whiteheads
- Reduces inflammatory acne and redness
- Improves post-acne marks and pigmentation
- Refines rough and uneven skin texture
- Minimizes recurrence of breakouts
- Leaves skin clearer, smoother, and more balanced
