

DIODE LASER HAIR REMOVAL

● Diode laser hair removal + Hair Analyser

Latest 4 Wavelengths
755/808/940/1064nm

- Fast and permanent hair removal.
- Suitable for all hair types and skin types, and painless.
- Hair analysis

● *Advantages*

1. USA imported Coherent brand laser bars, high power output.
2. Germany imported Crystal.
3. High efficiency absorption of melanin to achieve the effect of painless hair removal effectively.
4. Pain free. Sapphire touch cooling system can make sure that treatment more safe and no hurt to skin. Water+ air+ semiconductor cooling system, Italy water pump.
5. New add cooling refrigerator inside machine, to assure machine keep working long time with good cooling.
6. Metal structure inside, top quality laser.
7. Four spot sizes are convenient for different area treatment.
8. Permanent hair removal. Applicable to all skin color, excellent result.

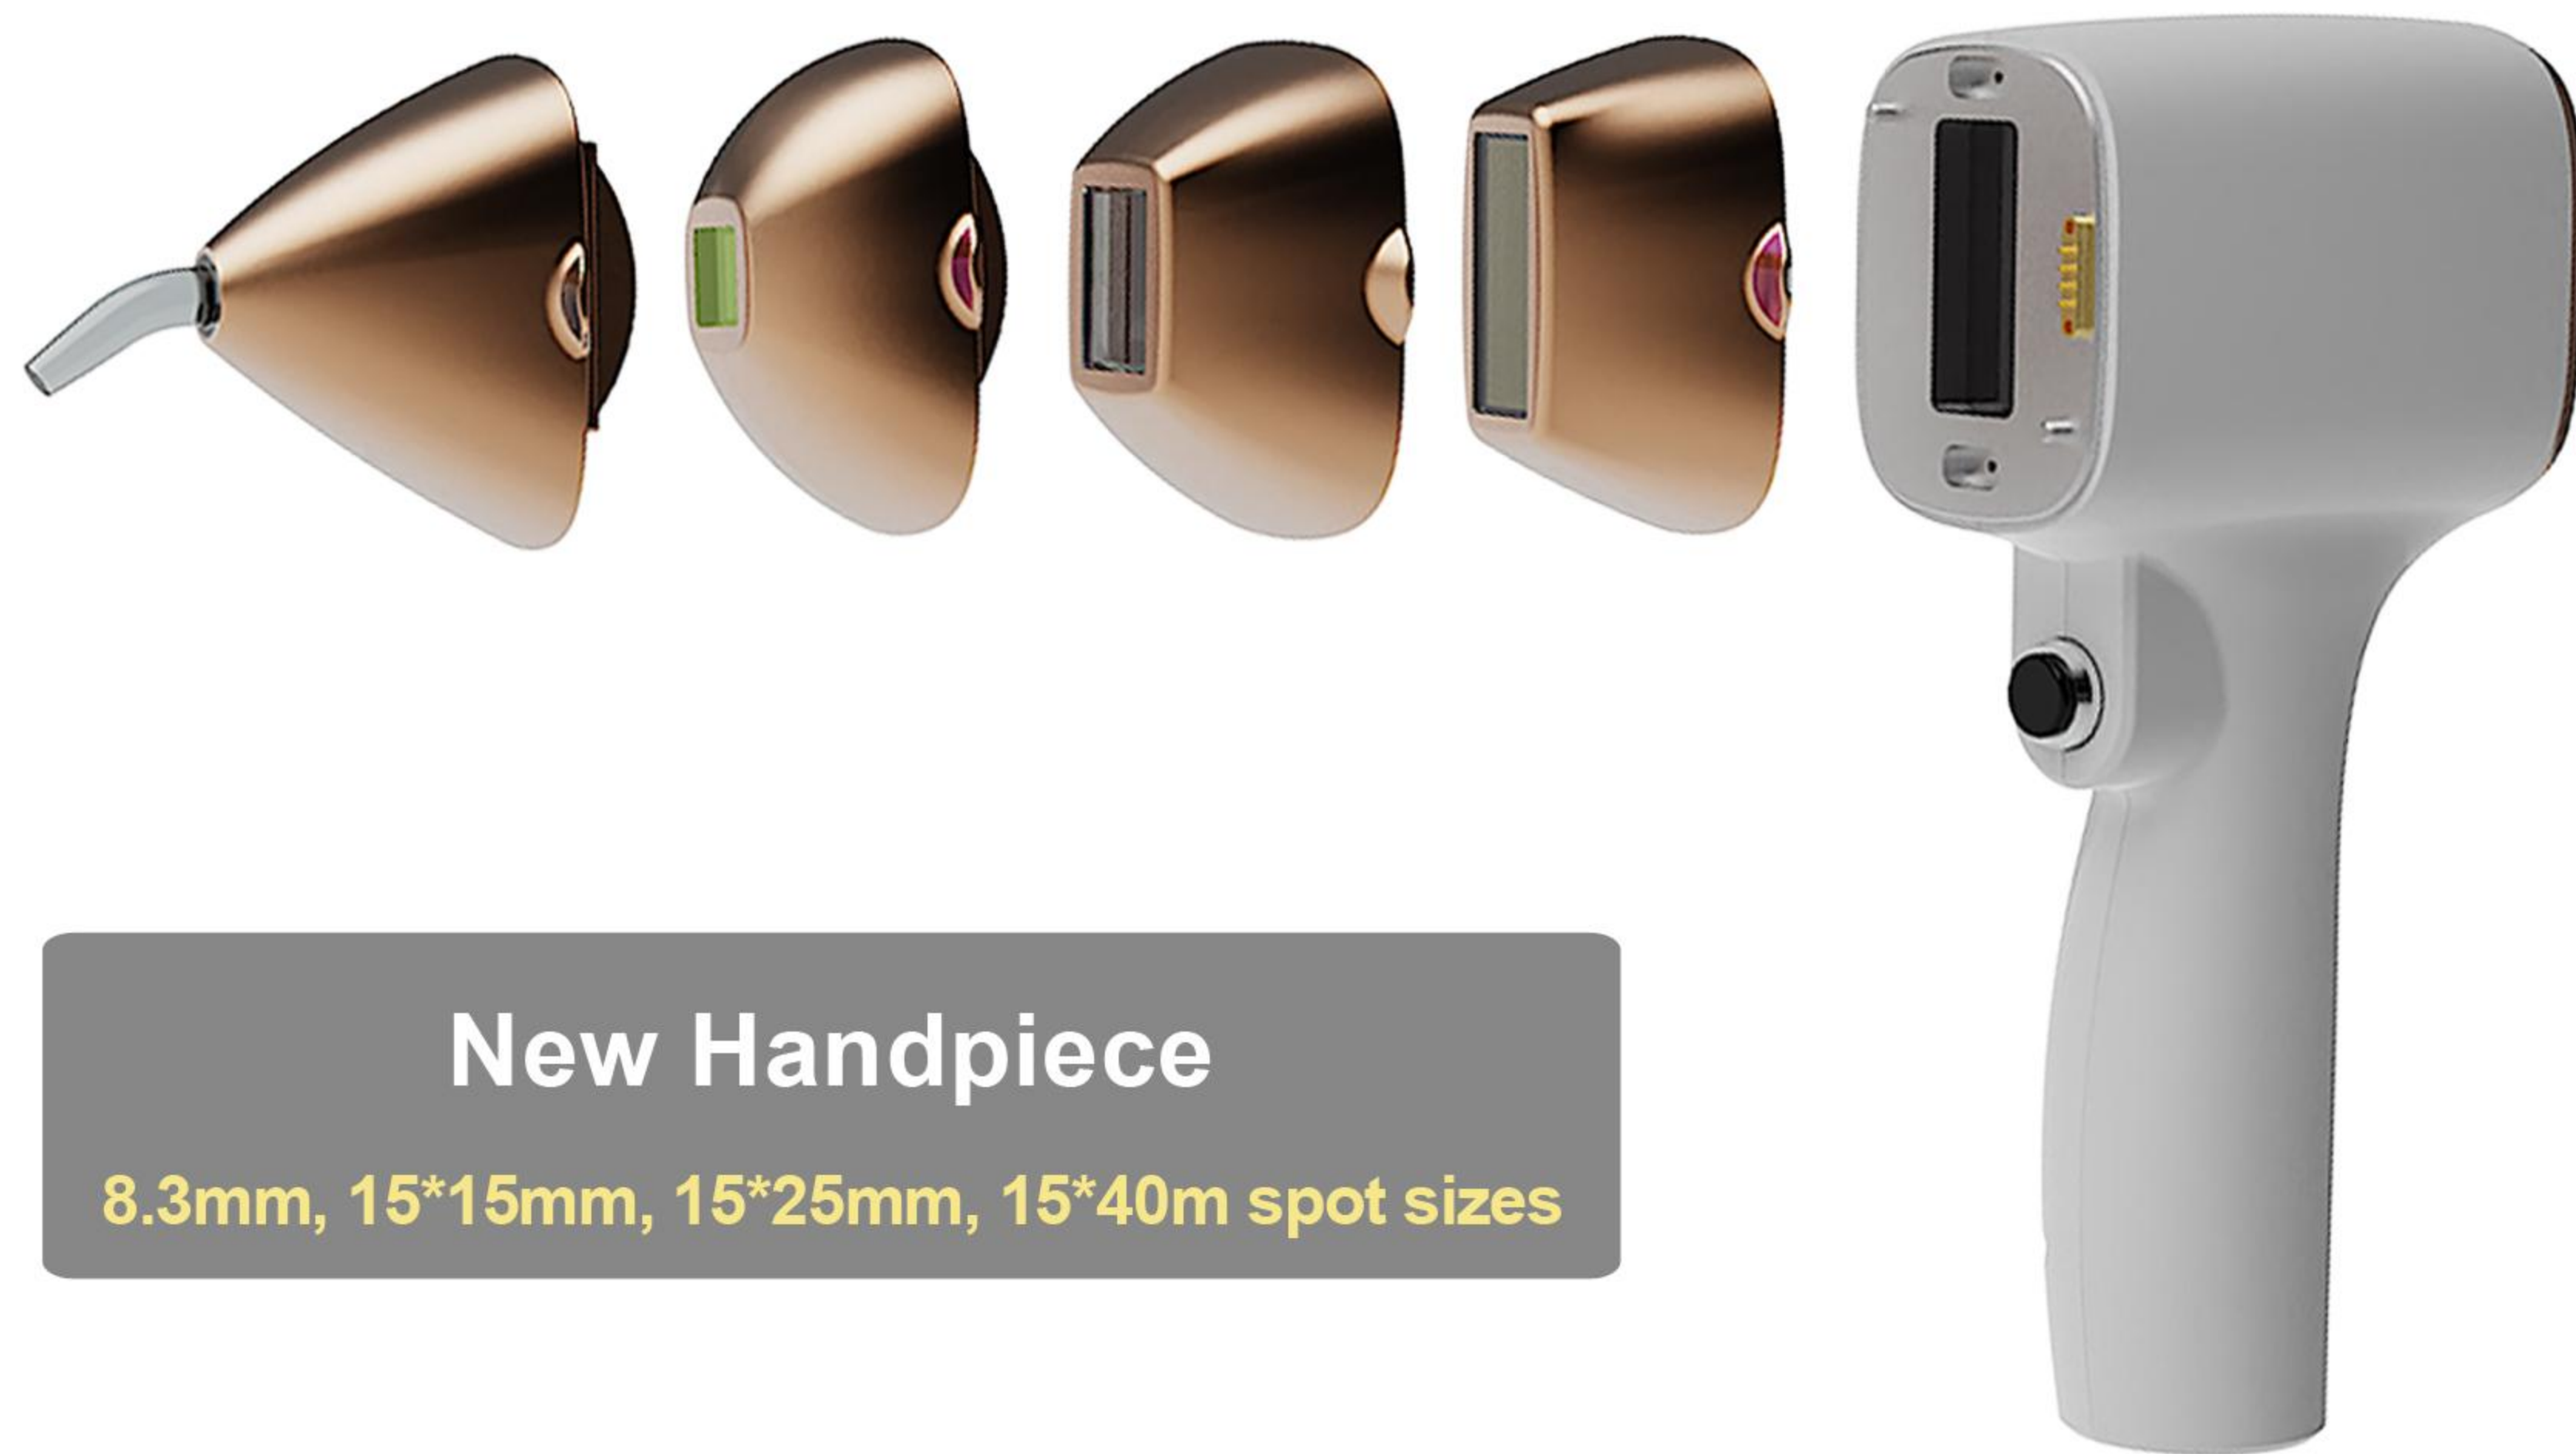

● MACHINE DISPLAY

- **15.6** inch Android screen.
- The display can be freely rotated up, down.
- Android system with customers information management.

- Hair detection function is added.
- Warranty period: 2 years

● HANDPIECE DETAILS

New Handpiece

8.3mm, 15*15mm, 15*25mm, 15*40mm spot sizes

Optional handpiece models

1200W/1600W/1800W/ 2000W/ 2400W for option

- Suitable for all hair types and skin types, and pain less.

4 WAVELENGTH

755NM+808NM+940NM+1064NM

Suitable for all hair colors and skin types

HANDLE SHOTS

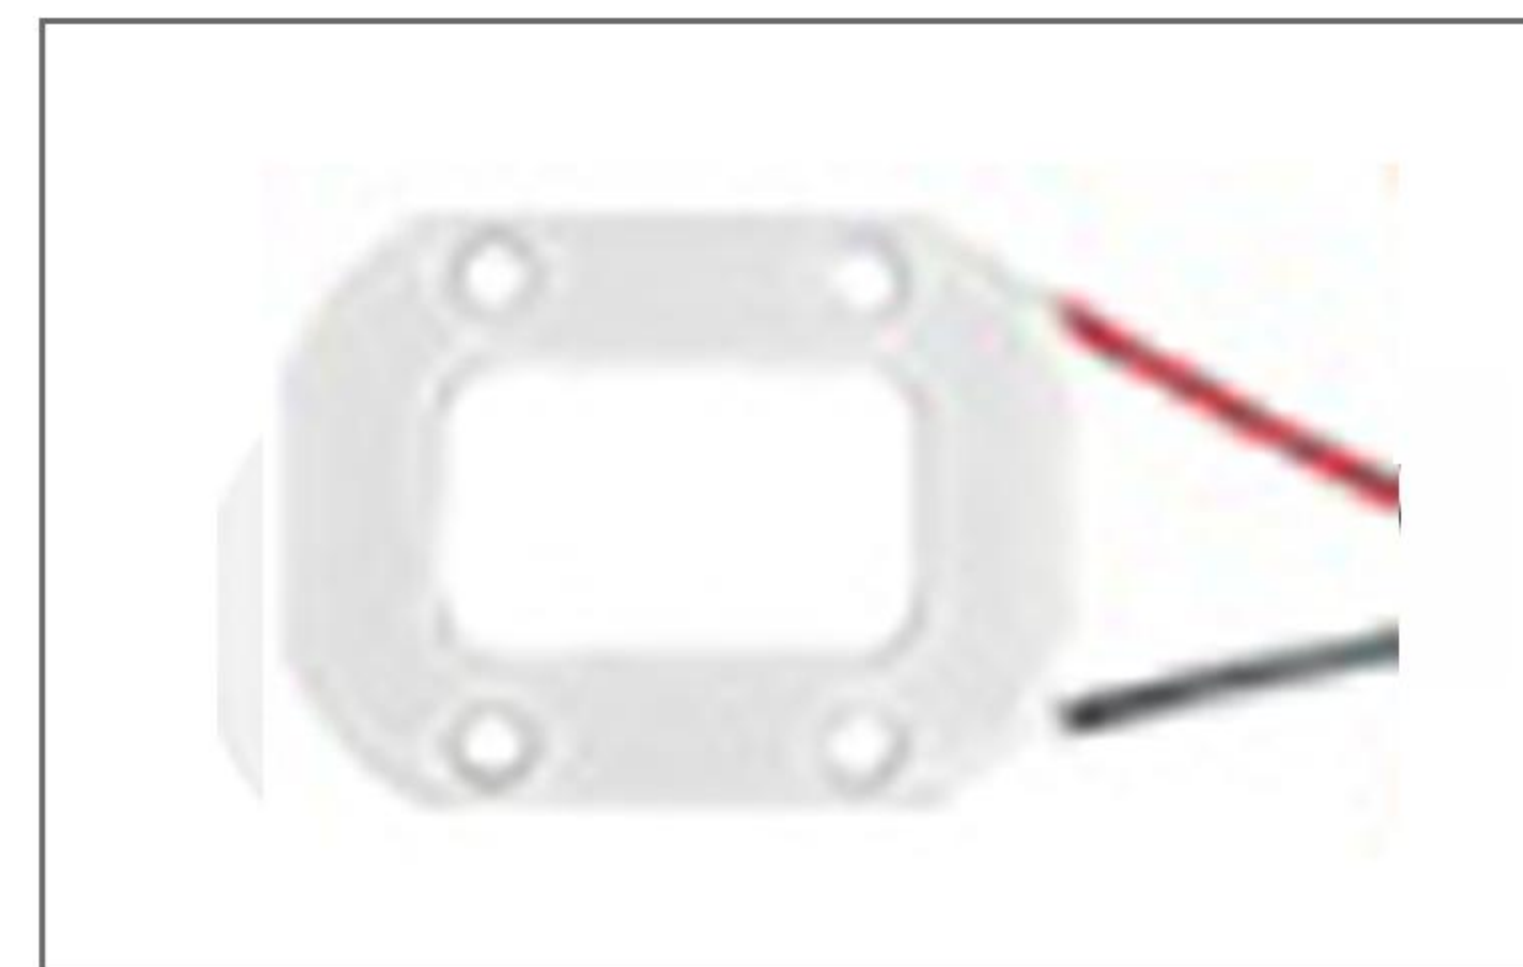

100 million shots

USA Coherent Laser Bars

Real sapphire Crystal

Before hair removal, make a reasonable analysis of the hair.

● Working Theory

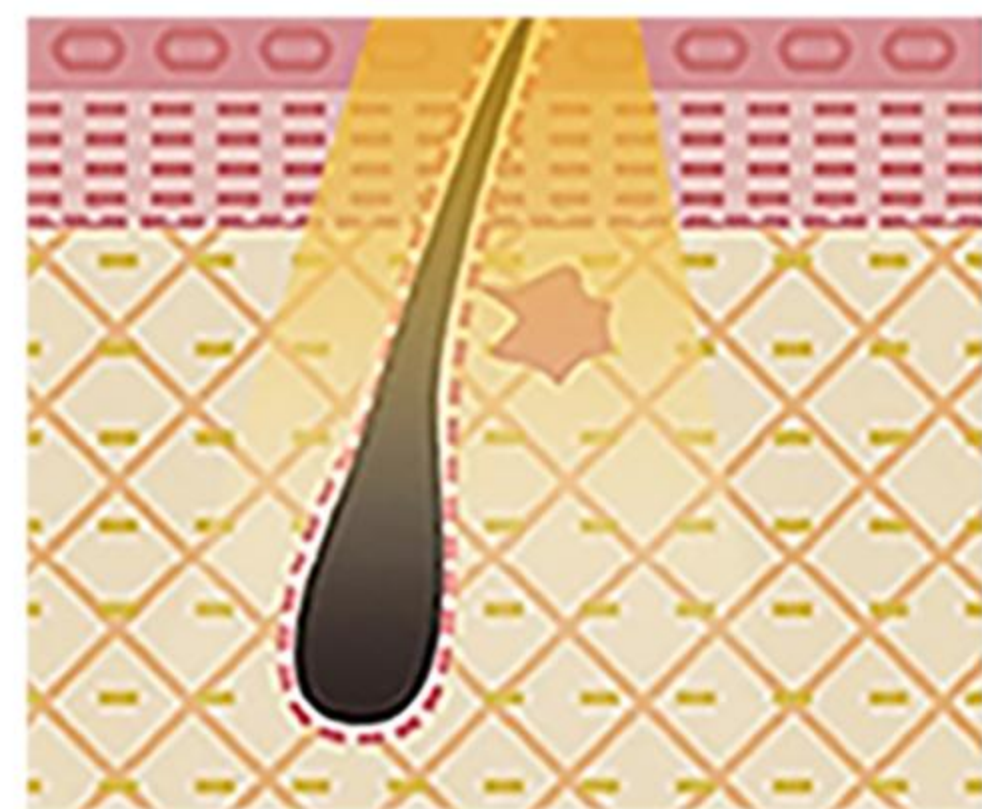

DIODE LASER HAIR REMOVAL MACHINE WORKING THEORY:

Clinically proven to deliver safe and effective hair removal on all skin and hair types, is the fastest diode laser in the market!

It is performed using gold standard diode laser technology, with energy penetrates deep into the dermis with high average power and a rapid 10 pulsepersecond repetition rate to heat the hair shaft and hair follicle, rather than destroy the oxygen organization around hair follicle.

Meanwhile, contacting surface cooling technology applied on the Sapphire DualChill Tip can eliminate the heat effect attributed to optical energy, greatly improving both the treatment performance and safety.

Emit a laser beam

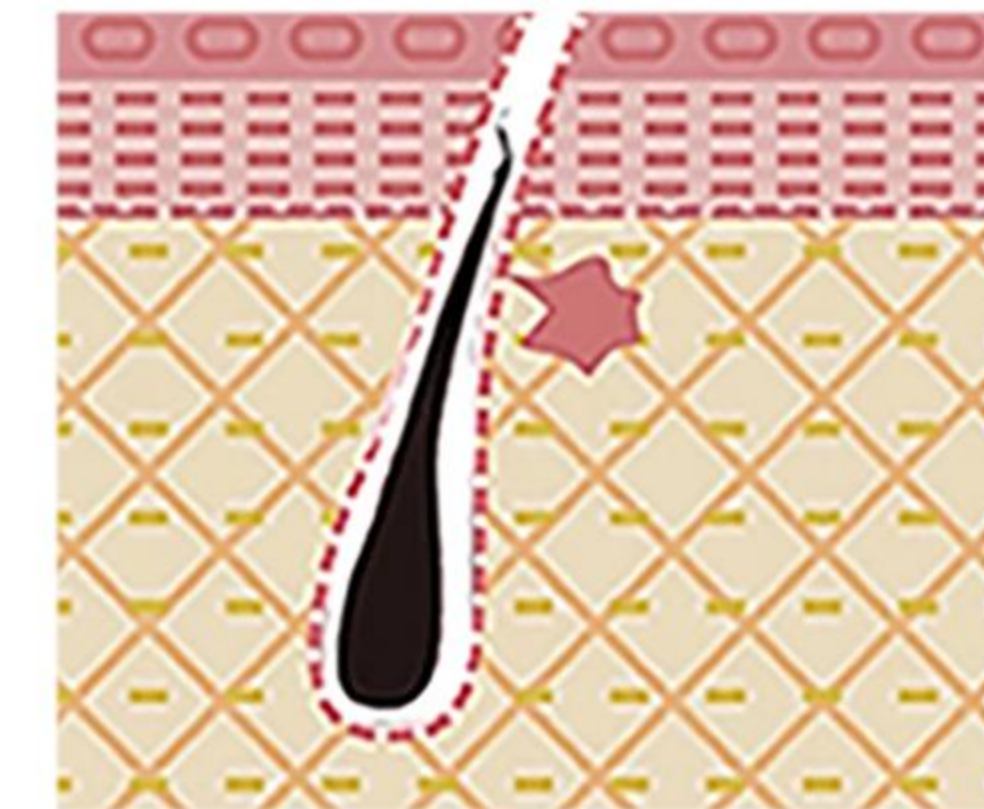

The laser beam is absorbed by hair follicle melanin

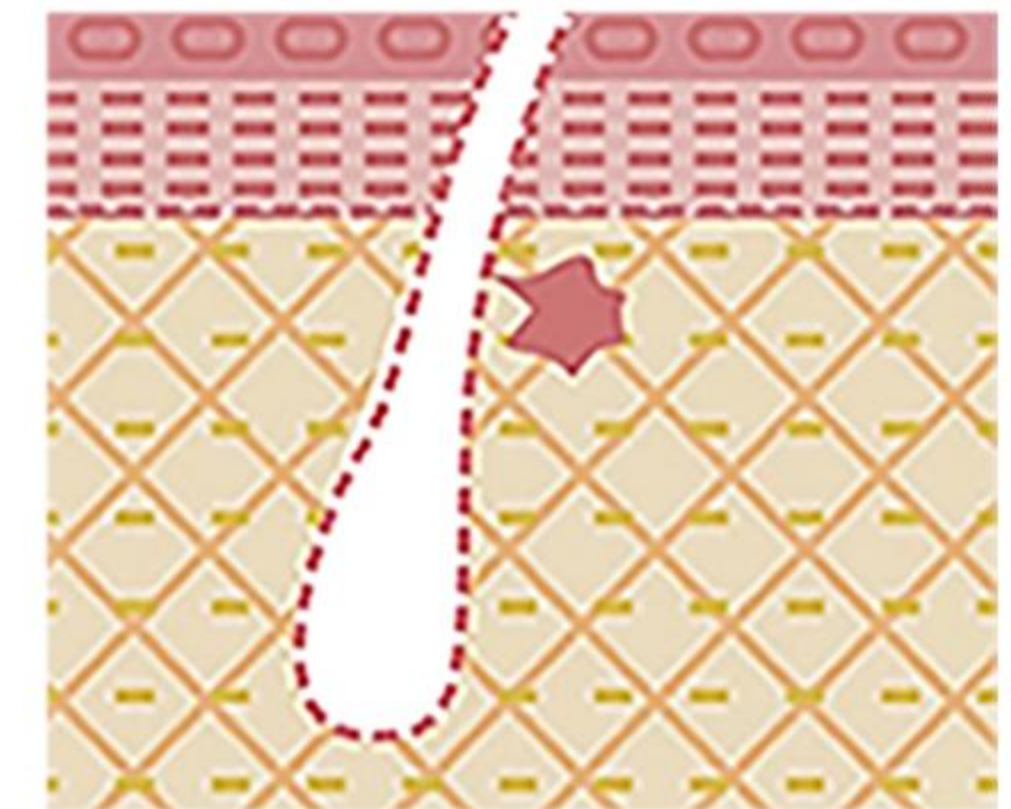

Different color hair has different ability to absorb light wave

After absorption, the laser energy will be converted into heat energy

Hair follicles and surrounding stem cells lose their activity and fall off

So reach hair removal effect

TECHNICAL SPECIFICATION

Laser type	600W/800W/1000W/1200W/1600W Diode Laser + Hair detection
Language	Different languages can built in the system
Display	15.6 inch Android screen
Spot size	8.3mm, 15*15mm, 15*25mm, 15*40 mm
Pulse width	10-400ms adjustable
Energy	10-120J/ cm ²
Frequency	1-20Hz
Cooling	Water + air + semiconductor + refrigerator
Temperature of probe	0~-16C
Handpiece cooling system	Sapphire TEC cooling+water cooling+real-time monitoring
Water System cooling	USA high power condenser module+fan cooling+real-time monitoring
Water system protection	Italian water pump, water flow, level, water temperature protection.
Continuous operation time	24 hours
Peak power	3000W
Shots time	100 million shots
Voltage	AC220V±22V, 50/60Hz,10A

MACHINE ACCESSORIES

		
Handpiece	Aluminum Handpiece Holder/Screw Driver	Hair Analyzer
		
Goggles	Glasses	Water Funnel
		
Foot Switch	Power line	Key
